INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference C37296PC	<b>FOR FURTHER ACTION</b> See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/EP2003/002489	International filing date (day/month/year) 11 March 2003 (11.03.2003)	Priority date (day/month/year) 11 March 2002 (11.03.2002)
International Patent Classification (IPC) or national classification and IPC C07C 233/00		
Applicant CURACYTE AG		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.
2. This REPORT consists of a total of <u>5</u> sheets, including this cover sheet.  <input checked="" type="checkbox"/> This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).  These annexes consist of a total of <u>13</u> sheets.
3. This report contains indications relating to the following items:  I <input checked="" type="checkbox"/> Basis of the report II <input type="checkbox"/> Priority III <input checked="" type="checkbox"/> Non-establishment of opinion with regard to novelty, inventive step and industrial applicability IV <input type="checkbox"/> Lack of unity of invention V <input checked="" type="checkbox"/> Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement VI <input type="checkbox"/> Certain documents cited VII <input type="checkbox"/> Certain defects in the international application VIII <input type="checkbox"/> Certain observations on the international application

Date of submission of the demand 27 August 2003 (27.08.2003)	Date of completion of this report 02 July 2004 (02.07.2004)
Name and mailing address of the IPEA/EP  Facsimile No.	Authorized officer  Telephone No.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP2003/002489

## I. Basis of the report

## 1. With regard to the elements of the international application:\*

- ☐ the international application as originally filed
- ☒ the description:  
pages \_\_\_\_\_ 1-48 \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_
- ☒ the claims:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, as amended (together with any statement under Article 19  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_ 1-20 \_\_\_\_\_, filed with the letter of \_\_\_\_\_ 19 February 2004 (19.02.2004)
- ☐ the drawings:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_
- ☐ the sequence listing part of the description:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_

## 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language \_\_\_\_\_ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

## 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages \_\_\_\_\_
- ☐ the claims, Nos. \_\_\_\_\_
- ☐ the drawings, sheets/fig \_\_\_\_\_

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).\*\*

\* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP2003/002489

## III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application.

☒ claims Nos. 19, 20

because:

☒ the said international application, or the said claims Nos. 19, 20  
relate to the following subject matter which does not require an international preliminary examination (*specify*):

See supplemental box

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. \_\_\_\_\_  
are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. \_\_\_\_\_ are so inadequately supported  
by the description that no meaningful opinion could be formed.

☐ no international search report has been established for said claims Nos. \_\_\_\_\_.

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

☐ the written form has not been furnished or does not comply with the standard.

☐ the computer readable form has not been furnished or does not comply with the standard.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/02489

**Supplemental Box**

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: III.1

**Non-establishment of opinion with regard to novelty,  
inventive step and industrial applicability**

Claims 19 and 20 relate to subject matter which this Authority considers to fall under PCT Rule 67.1(iv). Consequently, no opinion is established with regard to the industrial applicability of the subject matter of these claims (PCT Article 34(4)(a)(i)).

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	11-13	YES
	Claims	1-10, 14-20	NO
Inventive step (IS)	Claims	11-13	YES
	Claims	1-10, 14-20	NO
Industrial applicability (IA)	Claims	1-18	YES
	Claims		NO

## 2. Citations and explanations

Reference is made to the following document:

D1: DE-A-100 29 014.

**Novelty**

Document **D1** is considered to be the closest prior art for the subject matter of claims 1 to 20. D1 discloses urokinase inhibitors wherein the group corresponding to  $R_5$  represents, *inter alia*, H or a sulfonyl radical  $-SO_2-R$ , wherein R can be a substituted or unsubstituted aralkyl radical, and the group corresponding to  $R_2$  can be  $(CH_2)_n-OH$ . The compounds are suitable for the treatment and diagnosis of tumours (see claim 1).

The compounds in claims 1 and 20 have formulae which are represented in Markush format. A selection of several types of compounds, some non-specific, for a radical from lists of possibilities disclosed in D1 cannot be considered novel within the meaning of PCT Article 33(2). Restriction to compounds wherein the radical  $R_5$  contains a (substituted) benzyl radical could be considered novel if at least one polar group were present in the benzyl radical or in  $R_2$  (see the compounds as per claim 11).

Consequently, the subject matter of claims 1 to 10 and 14 to 20 does not comply with the requirements of PCT Article 33(2).

In the compounds as per claim 11, at least either one hydrogen in the benzyl radical is substituted by a polar group or the radical  $R_2$  is defined by a polar group.

A combination of this kind with a benzyl group as a specific radical is not to be found in document D1 and is therefore novel.

For the individual compounds in claims 12 to 13, at least two substituents are selected from two lists of alternatives disclosed for various substituents, for which novelty is acknowledged.

The subject matter of claims 11 to 13 is therefore novel (PCT Article 33(2)).

#### **Inventive step**

The problem addressed by the subject matter of claims 11 to 13 can therefore be considered that of providing further urokinase inhibitors for treatment and diagnosis.

The solution to this problem as proposed in claims 11 to 13 of the present application involves an inventive step (PCT Article 33(3)), because the claimed compounds exhibit reduced elimination time together with high activity. A property of this kind is not to be found in the cited prior art and is therefore not obvious for a person skilled in the art.

**Industrial applicability**

The PCT Contracting States do not have uniform criteria for assessing the industrial applicability of claims 19 and 20 in their present form. Patentability may also depend on the wording of the claims. The EPO, for example, does not recognize the industrial applicability of claims to the medical use of a compound; it may, however, allow claims to the first medical application of a known compound or to the use of such a compound in the manufacture of a drug for a new medical application.
